

Having fun with music

How can I implement an engaging music lesson?

- Music is joy!
- Everyone must feel that they are involved.
- Start with the kind of music that the participants like.
- Everybody shall be included based on their preconditions.
- It is important to get started at once and getting good quality of the music.
- Start with a warming up so that you get a good mood which is permissive and relaxed.
- Implement an exercise of presentation so that all participants feel that they are seen.
- Let the different participants play the leading role in the music they have chosen by themselves.
- If any of the participants have a hard time reading the text, give them a recording to train to.
- A group will grow if you sometimes integrate them with others. Meetings by music!
- Please use instruments!
- Start at the level where the group is.
- The more skilled pedagogue, the greater possibilities of development.
